INDIAN DELEGATION TO PARIS .- It has been definitely settled that a large delegation from the Northwest tribes of Indians are to be sent as a contribution from the United States to the Exposition. They will carry with them their various costumes, wigwams, war and agricultural implements, and will form the only contribution from the United States to the tenth group within the limits of the Exposition. They will leave New York about the 10th of March. The Imperial Commission has made the most urgent requests, through Commissioner General Beckwith, to our Government, that there should be such a representation of our

CURING MEAT. - As the time for putting up meat for the next year is at hand, we invite attention to the following method for curing meat, recommended by a writer in the Southern Cultivator:

Kill early, if practicable. Salt in boxes or troughs having holes in the bottom, so that brine, or fluids extracted from the meat, may run off. else it will injure the flavor of the meat. Let it remain in salt about four weeks, frequently rubbing it with dry salt. At the end of that time rub off the surplus salt, and hang up and smoke. To keep skippers out of meat, keep the fly off. This will be easily accomplished by having a closely built smoke-honse, so that when the door is shut it will be perfectly dark. A smoke-house should be dry, and so high that the meat will not be heated during the smoking. Keep your meat dry, cool, and in the dark. Flies will not enter a dark place; but they will leave the dark for the

PUTNAM & MALONE.

For Cotton Bales. UNITED STATES PATENT, APRIL, 1865 IN FASSMAN'S PATENT IRON TIES, the hoop for the button is punched with two holes at one end and fifteen at the other. The band has only to be drawn tight, the holes in the two ends to be brought together,—the two bole end on top—and the button inserted. One button will answer,

but it is better to insert two.

With the Buckle Tie, one end of the hoop is fas-tened to one section of the Buckle, the other end is inserted in the other section, and simply shoved through it under the other end as long as there is any slack. A bite on the buckle holds it securely to The hoors are painted to prevent rust, and cut in lengths of 10, 101 and 1 feet. Ten feet are most generally used, but 10½ and 11 are sometimes required for large bales. The buckles are fastened to the

hoops, the buttons will be put up in small boxes. The Weight is About 10 Pounds to the Bale of Cotton.

The advantages of iron over rope for baling cotton are now universally acknowledged. It holds the bale in a much smaller compass; is applied and fas-tened with as much facility, both in the country pressing and the re-compressing at the sea ports; lessens immensely the risk from fire; is stronger, and its strength is not impaired by time and expo-sure as is that of rope. This last advantage has seed st ikingly manifested during the wer. Thou-Represented by Capt. J. A. BINIORD, Duck ill, Miss.

[oc7-d6m]

| Danus et dates of Cotton Law being and breaking of Rope which could have been preserved if Iron hoops had been used. In addition to this, it can be furnished cheaper than Rope. The bands of bales of Cotton have been lost by the rot derangement of labor in the hemp growing states has reduced the supply of hemp to such an extent as to cause prices to rule unprecedently high; in-deed a sufficiency for baling a moderate cotton crop, cannot be relied on at any price.

I have arranged for the importation of a large quantity of the best English Iron, and have made arrangements with Messrs. Chambers & Latting for the sale and delivery of my Ties. The undersigned, Fire Warden and Fire Inspec-tor of the New Orleans Insurance Companies, are of

opinion that the Iron Tie affords greater protection against loss in case of fire than the old style of baling J. YOUENES, Fi e Warden, J. HN ADAMS, Fire Inspector. with rope. I concur in the above, ALFRED BELANGER,

Ex-Chief Engineer, Fire Department. SHIP REFUGE, NEW ORLEANS, July 7, 1859. H. Fasemann, Esq , Orleans Cotion Press:

Sir: In January last I received from your Press 1089 bales of cotton, of which about 1000 were recom-pressed and bound with your new "Iron Tie." I can safely affirm that the cotton so bound was received in better order than it generally comes from the Presses, that it stowed better, and enabled the ship to carry more than on any previous voyage The cotton when discharged from the ship in Liverpool, was in better order than the repe bound cetton, it is highly preferable for a ground tier, as dampness from the ballast has no effect upon it, for it is well known by practical men that dampuess will rot the rope bound. I can confidently recommend your "Iron Tie," as I took this lot for an experiment and carefully watched it both in loading and discharging.

I am Sir, Yours Respectfully, JOHN HOWARD, Master.
